

BENTLEY BIM- Advancement Centre

Around the world, engineers and architects, constructors and owner-operators are using Bentley's software solutions to accelerate project delivery and improve asset performance for the infrastructure that sustains our economy and our environment.

Bentley products such a **STAAD-PRO, WATERCAD, power GEOPAK** etc are used by Civil Engineers worldwide. Their catalogue has upwards of 60 softwares, which are useful tools in Civil Engineering branches such as Geotechnical, Structural, Hydraulics and water resource management.

Currently, the **Department of Civil Engineering** is in the process of signing a **Memorandum of Understanding** which will enable a prolonged and healthy correspondence between the company and the department. As a part of this process, a three day training program is being conducted for a few select faculty members and students, starting June 19, 2017. Official signing of the **MoU** will take place in an institute wide grand function on June 23, 2017.
